

## SMART Board™ 600i interactive whiteboard system

### Lively lessons

With the SMART Board 600i interactive whiteboard system, you can take your pupils to the heart of learning. Combining a short-throw Unifi™ 45 projector and a SMART Board™ 680 interactive whiteboard, the 680i allows you to easily incorporate multimedia elements, such as videos and interactive demonstrations. The system makes lessons more appealing and encourages active participation.

### Complete control

The 600i is a convenient, economical tool and has features specifically designed to help you to make the most out of your class time. The system starts up quickly with the push of a button, and the control panel allows you to add and switch between classroom peripherals, such as laptops, DVD players and digital cameras – you don't need to use a remote control.

Combining true colour with high levels of brightness and contrast, the 600i provides a clear, crisp image. And when you add an optional speaker system, the 600i becomes a complete multimedia centre, creating a focal point where everyone can hear, see and participate. You can also add the height-adjustable wall mount so pupils of any height can reach the interactive whiteboard.

### Perfect positioning

With the 600i, installation and maintenance are effortless. The projector is located directly above the interactive whiteboard, eliminating the need for complicated wiring or ceiling mounting. The placement of the projector reduces the appearance of shadows and prevents any light from shining in your eyes as you work.

### Secure solution

The projector is rendered inoperable if disconnected from the interactive whiteboard, and with three locking mechanisms, the projector is inherently theft-proof. Additionally, if the boom is deliberately damaged, the collapsible boom feature allows for quick serviceability with a replacement part.

The 600i is a highly affordable integrated solution for classrooms – it simplifies lesson planning and intensifies classroom engagement.

**Touch the interactive whiteboard to control computer applications, and then write over them in digital ink. The wall-mounted projector reduces distracting shadows for you and your pupils.**

## Dimensions

### Active screen size

Model	area (diagonal)
<b>SB680i</b>	77" (195.6 cm)

## Features

- 1** Unifi 45 projector
- 2** Touch-sensitive surface
- 3** Control panel
- 4** Eraser and pens

## Key features

- **SMART Board interactive whiteboard** – The touch-sensitive display connects to your computer and Unifi 45 projector to show your computer image. You can then control computer applications directly from the display, write notes in digital ink and save your work to share later. The SMART Board interactive whiteboard comes with feature-rich Notebook™ collaborative learning software.
- **Unifi 45 projector** – An integrated XGA (1024 x 768) projector and unique collapsible boom that protects the system against inadvertent damage or misuse.
- **Control panel** – From here, you can turn the projector on or off, and easily connect or switch between peripherals, such as laptops, MP3 players, document cameras and DVD players.
- **Closed projector engine** – The Unifi projector uses DLP® technology and does not require cleaning or filter replacement.
- **Warranty** – Three-year warranty on the Unifi projector, 90-day or 500-hour warranty on lamp. SMART Board interactive whiteboard warranty is five years upon product registration, two years standard.

## Optional accessories

- **Height-adjustable wall mount** – Raise or lower the interactive whiteboard to set the desired height. Make smooth adjustments, even with one hand.

### Features

- Installs easily
  - Adjusts by 50 cm
  - Locks the entire system at its highest position
- **USB audio system** – Two 15-watt, stereo-amplified speakers, with a two-port USB hub, that mount to the SMART Board interactive whiteboard or on the wall.
  - **SMART classroom audio system** – A complete wireless audio system that features two microphones, a wireless transmitter, amplifier and four speakers. The system evenly distributes sound across a room, and voice recordings can be integrated into Notebook software lessons.

SMART delivers the most comprehensive and best integrated portfolio of premium software and content resources for educators.

## Notebook software and SMART Board Tools

Notebook software provides the tools to create and deliver engaging and interactive lessons across all grades and subject areas.

- Create dynamic lessons using Notebook software's Gallery of thousands of vibrant, curriculum relevant images, video files and lesson activities
- Save files in various formats and e-mail them to pupils for review
- Write over moving or paused video, or record all screen activity as a video
- Focus attention with the resizable Spotlight tool, or use the Screen Shade to reveal your information

## The SMART Learning Marketplace

The SMART Learning Marketplace, powered by the Global Grid for Learning, a Cambridge University Press company, is a content subscription service that allows you to quickly find and integrate digital resources into lessons.

- Access over a million copyright-cleared images, video files, audio clips and manipulatives
- Conduct a search directly from Notebook software or from the online search portal
- Insert professionally developed content from trusted content providers

## Complementary resources

### SMART Exchange

Access the free community network that provides a wealth of technology-enabled learning resources.

### SMART accredited titles

To ensure that you can find complementary multimedia content and software that works with your SMART Board interactive whiteboard and Notebook software, SMART accredits titles through the Software Accreditation Program.

### Lesson activities

Created by educators for educators, SMART lesson activities are correlated to local curriculum standards for all core subjects.
